MISCELLANEOUS.

MYSORE GOVERNMENT MUSEUM, BANGALORE.

List of specifications filed by the Mysore Government and of those accepted and received from the Controller of Patents and Designs, Calcutta, available for inspection at the Government Museum, Bangalore.

ο,	Name of specification	Name of Inventor
	(a) Filed by the Government of Mysore.	
1	Invention for an improved lever-gripper attachments for ore feeders and the like.	Charles Frederick Strauss.
2	Invention for improvements in or relating to typographic machines.	Alfred Julins Boult.
3	Invention for improvements in or relating to the separation of metals from their ores.	Jacob David Wolf.
4	Invention for improvements in Linotype Machines.	Charles Showlier Woodroffe.
5 6	Improvements in Automatic ore-feeders Invention for improvements in the manufac-	Fred. Hosking and A. Curnow. Collos Portland Cement, Co., Ltd.
7	ture of cement from furnace slag. Invention for new process for the extraction	Herbert Spencer Stark.
	of gold from auriferous ores, particularly applicable to the recovery of gold from the residues resulting from the treatment of pyritic ores by ordinary cyanide solutions.	
8	Invention for improvements in utilizing bye- products of Cyanide gold extraction process.	Frank Ondra.
9	Invention for process and apparatus for re- covering solids of liquids.	L. C. Merrell, I. S. Merrell and W B. Gere.
0	Invention for improvements in Ore-crushing machines.	C. B. Coverdale Storey and J. Andrey Wanchope.
1	Invention for improvements in apparatus for sharpening drills or drill bits.	Walter Edward Kimber.
12	Invention for a Victor improved Huller and Hammer being an improvement in machinery or appliances for removing husks from paddy or other grains or for effecting operations of impact.	M. V. Srinivasa Iyengar.
13	Invention for improvements in means for separating dirt and the like from the refuse or waste of cotton cleaning machines and from other materials.	William Youlten.
14	Invention for improvements in connection with disintegrating, washing and screening machines.	Charles Blades Coverdale Storey.
15	Invention for process for fitering slimes	Charles Butters.
16	Invention for improvements in adjustable guides or slides for rock-drills and other tools or machines.	W. C. Stephens.
17	Invention for an Atmospheric filter	George Ridgway.
18	Invention for an improved filter frame and process of filteration.	Hugo Philip Crush.
19	Invention for improvements in boring or drilling rocks and the like and apparatus therefor.	W. C. Stephens.
20	Invention for improved method of and means for justifying tabular matter in Linotype machines.	Linotype and Machinery, Limited.
21	Invention for improvements in typographical composing and distributing machines.	Do do
22	Invention for improvements in Linotype machines,	Do do
23	Invention for improvements in bits or drills for boring rocks and other hard substances.	W. C. Stephens.

List of specifications filed in the Mysore Government Museum, Bangalore—contd.

		.**
No.	Name of specification	Name of Inventor
24	Invention for improvements in or relating to the separation of the liquid and solid com- ponents of a fluid mass such as wet slimes	Horace George Nichols.
	or ore-pulp or for the like and analogous purposes.	
25	Invention for mounting heads of animals	Theobald Brothers.
26	Invention for improvements relating to the treatment of comminuted solids by liquids and in particular to the treatment of ores by solvent for the extraction of the metals	The Adair-Ushar Process, Ltd.
27	therefrom. Invention for improvements in or connected	W. C. Stephens.
28	with percussive rock-drills. Invention for improvements in or connected	Do
29	with rock-drills. Invention for improvements in or relating to	Auto-Hydraulic, Ltd.
30	automatic water elevators. Invention for improvements in or relating to the distributors of double magazine linotype machines.	Linotype and Machinery, Ltd.
31	Invention for improvements in and connected with the trimming mechanism of linotype machines.	Do do
32	Invention for improvements in the moulds and ejectors of linotype machines.	Do do
33—2	Invention for improvements in or relating to	John Blum and Alfred William Carpenter.
34	the manufacture of artificial Para rubber. Invention for improvements in the magazines of linotype machines.	Linotype and Machinery, Ltd.
35	Invention for improvements in the process of and apparatus for directly reducing iron ore	Montague Moore and Thomas James Heskett.
	and subsequently treating same for the manufacture of wrought iron and steel.	
36	Invention for improvements in the quadding apparatus of linotype machines.	Linotype and Machinery, Ltd.
37	Invention for improvements in the assemblers of typographic composing machines.	Do do
38	Invention for improvements in typographical composing machines.	Arthur Hungerford Pollen
39	Invention for improvements in straight way valves.	Ivan Bevan and Frederic Anderson.
40	Improvements in or relating to liquid containers and valve mechanism therefor par-	Auto-Hydraulic, Ltd.
4 1—2	ticularly applicable for use in water and like elevators. Invention for improvements in typographi-	Linotype and Machinery, Ltd.
	cal composing machines.	
42	Invention for improvements connected with the magazines of typographical composing machines.	Arthur Hungerford Pollen.
43	Invention for improvements in the lixiviation of ores and the like.	Alfred James.
44	Invention for improvements relating to per- cussive machines for rock-drilling and ana-	The Konomax Rock Drill Syndicate, Ltd.
45	logous purposes. Invention for improvements in valve devices for rock-drilling and similar reciprocating	John Slorach:
46	engines. Invention for improvements relating to the	Murex Magnetic Co., Ltd.

List of specifications filed in the Mysore Government Museum, Bangalore—contd.

	*	
No.	Name of specification	Name of Inventor
47	Invention for improvements in machines for decorticating the fibrous leaves or stems	Ernest Wright.
48	of plants. Invention for improvements in the manufacture of alkaline cyanides.	John Dewrance and Herbert Ernest Williams.
49	Invention for improvements in extracting gold and silver from crushed ore and ore slimes and means therefor.	Andrew Frederick Crosse.
50	Invention for an improvement in rock-drill-	The Rock-drill appliances Syndicate, Ltd.
51	ing machines. Invention for improvements in means for separating liquid from crushed ore products or other granular materials.	William Arthur Caldecott.
52	Invention for improvements in filters for metallurgical and other uses.	The Butters Patent Vacuum Filter Company, Incorporated.
53	Invention for improvements for continuous slimes Vacuum Filter.	Arthur Eilert Drucker.
54	Invention for improvements in Pulp-diverting means for amalgamating plates.	Ernest Holyroyd Martin.
55	Invention for improvements in and relating to the treatment of India-rubber.	Thomas Cockerill.
56	Invention for improvements in the treatment of precious metalliferous ores.	Clancy Metals Process Company.
57 .	Invention for improvements in the prepara-	Ernest Holyroyd Martin.
58	tion of ore and the like for milling. Invention for improvements in pulleys or idlers for conveyer belts also applicable for	James Chalmers John Stone.
59	other purposes. Invention for the treatment of ores bearing	Clancy Metals Process Company.
60	precious metals. Improvements in the direct production of iron and steel from the ore.	William Speirs Simpson and Howard Oviatt.
61	Improvements in and relating to the treatment of Ramie China grass and other fibrous substances.	Louis Henry Raw.
62	Process for softening water in the use of zeolites or hydrated Alumino Silicates.	William Edward Evans.
63	Process for the production of hydrated Alumino Silicates or artificial zeolites for use in softening of water and for all purposes to	Do do
64	which zeolites can be applied. Improvements in chucks for rock-drills and	William Edward Harding and John
65	other purposes. Process and apparatus for the evaporation of	Hunter. Trumble Refining Company.
66	liquid. Process for the precipitation of precious	James Miller Neil.
67	metal from cyanide solution. Improvements in connection with furnaces for the direct production of iron and steel from	William Speirs Simpson and Howard Oviatt.
68	iron ores. Improved process for the recovery of gold and silver from antimonial, arsenical and other	James Gitsham.
68 (a)	gold bearing ores. Invention for improvements relating to the wet treatment of finely comminuted ores, or	C. E. D. Usher.
(b)	slimes for the extraction of their metallic contents or otherwise and particularly to the treatment of auriferous ores by cyanide. Accepted specifications received from the Controller of Patents and Designs, Calcutta.	

List of specifications filed in the Mysore Government Museum, Bangalore—contd.

and purifying liquids and regenerating perishable liquids and materials. Heating and ventilating systems, more especially for railway vehicles. Improvements in or relating to rubber tyres and their attachment to wheels. Improvements in parachutes Improvements in or treating to metallic railway ties or sleepers. Improvements in or in connection with the stripping rollers of carding engines. Improvements in or in connection with the stripping rollers of carding engines. Improvements in connection with furnaces for the direct production of iron and steel from iron ores. Process for the precipitation of precious metals from cyanide solution. Improvements in tires for wheels Improvements in or relating to the jointing of ropes of rubber to be used for wheel tyres and the transmission. Improvements in man relating to telephone transmitters and receivers. Improvements in and relating to electric signalling on railways. Process for the manufacture of India-rubber. Beingrovements in bibbins for spinning An improvements in threshing machines Improvements in threshing machines An improvements in threshing machine cylinders An improvement in storm and dustproof tiles and ridging. Folding box Upholsteries Improvements in and connected with bobbins for spinning. Improvements in and connected with devices for positioning shuttles in looms. Improvements in apparatus for machining curved stereotype plates. Improvements in pless, piers, wharves and like structures. Improvements in biling press of toggle lever type. In Improvements in biling press of toggle lever type. In Improvements in half press of toggle lever type.	No.	Name of specification	Name of Inventor
Improvements in electric lighting, heating and ventilating systems, more especially for railway vehicles. Improvements in or relating to rubber tyres and their attachment to wheels. Improvements in parachutes Improvements in or trotary engines and pumps Improvements in or relating to metallic railway ties or sleepers. Improvements in or in connection with the stripping rollers of carding engines. Improvements in connection with furnaces for the direct production of iron and steel from iron ores. Process for the precipitation of precious metals from cyanide solution. Improvements in fountains for decorative purposes. Improvements in fountains for decorative purposes. Improvements in or relating to the jointing of ropes of rubber to be used for wheel tyres and the transmission. Improvements in means for closing bottles Improvements in man relating to electric signalling on railways. Process for the manufacture of India-rubber Devices for spinning and twisting fibre Improvements in threshing machine sylinders. An improvements in threshing machine cylinders. An improvements in threshing machine cylinders. An improvements in threshing machine cylinders. An improvements in or connected with bobbins for spinning. Improvements in and connected with bobbins for spinning. Improvements in an or connected with bobbins for spinning shuttles in looms. Improvements in an and connected with bobbins for spinning shuttles in looms. Improvements in apparatus for machining curved stereotype plates. Improvements in piles, piers, wharves and like structures. Improvements in piles, piers, wharves and like structures. Improvements in biling press of toggle lever type. Improvements in and relating to a gripping. ILlewellyn Wynn Williams and Lawring with waporitied the column and floor of beam connections. Improvements in and column and floor of beam connections. Improvements in biling press of toggle lever type.	69	and purifying liquids and regenerating per-	Douglas Leicester Vernon Browne and Jean Masson.
Improvements in or relating to rubber tyres and their attachment to wheels. Improvements in parachutes	70	Improvements in electric lighting, heating and ventilating systems, more especially for rail-	J. Stone & Co., Ltd.
Improvements in parachates	71	Improvements in or relating to rubber tyres	Edward Brice Killen.
Improvements in rotary engines and pumps Improvements in or relating to metallic railway ties or sleepers. Improvements in or in connection with the stripping rollers of carding engines. Improvements in connection with furnaces for the direct production of iron and steel from iron ores. Process for the precipitation of precious metals from cyanide solution. Improvements in fountains for decorative purposes. Improvements in or relating to the jointing of ropes of rubber to be used for wheel tyres and the transmission. Improvements in means for closing bottles Improvements in and relating to electric signaling on railways. Process for the manufacture of India-rubber Devices for spinning and twisting fibre Improvements in threshing machines Improvements in the provements in the provements Improvements in threshing machines Improvements in threshing machines Improvements in threshing machines Improvements in threshing machine cylinders Automatic charsa Improvements in threshing machine cylinders Improvements in threshing machine solution or illuminating apparatus, working with vaporized hydrocarbon. Improvements in sorm and dustproof tiles and ridging. Folding box Upholsteries Improvements in apparatus for machining curved stereotype plates. Improvements in apparatus for machining curved stereotype plates. Improvements in plies, piers, wharves and like structures. Improvements in boiling press of toggle lever type. Improvements in and relating to a gripping Levellyn Wynn Williams and the transmitted for a gripping Levellyn Wynn Williams and middle Improvements in and relating to the jointing of roccurs of ruber threat Improvements in sensor of cleaning water pipes Improvements in apparatus for machining curved stereotype plates. Improvements in apparatus for machining curved stereotype plates. Improvements in or column and floor of beam connections. Improvements in and relating to a gripping Improvements in and relating to a gripping	72	A contract of the contract of	Adolf Freiherr Odkolck Von Angord
Improvements in or relating to metallic railway ties or sleepers. Improvements in or in connection with the stripping rollers of carding engines. Improvements in connection with the stripping rollers of carding engines. Improvements in connection with furnaces for the direct production of iron and steel from iron ores. Improvements in tires for wheels Improvements in the for wheels Improvements in fountains for decorative purposes. Improvements in or relating to the jointing of ropes of rubber to be used for wheel tyres and the transmission. Improvements in means for closing bottles Improvements in and relating to electric signalling on railways. Improvements in and relating to electric signalling on railways. Improvements in typewriting machines Improvements in bibbins for spinning An improvement relating to motor ploughs Improvements in threshing machine cylinders. Improvements in apparatus for heating or illuminating apparatus, working with vaporized hydrocarbon. Improvements in an apparatus for machining curved storeotype plates. Improvements in apparatus for machining curved storeotype plates. Improvements in apparatus for machining curved storeotype plates. Improvements in piles, piers, wharves and like structures. Improvements in molds Improvements in and relating to a gripping Individ	73		George Richard Inshaw
Improvements in or in connection with the stripping rollers of carding engines. Improvements in connection with furnaces for the direct production of iron and steel from iron ores. Process for the precipitation of precious metals from cyanide solution. Improvements in tires for wheels Improvements in fountains for decorative purposes. Improvements in or relating to the jointing of ropes of rubber to be used for wheel tyres and the transmission. Improvements in means for closing bottles Improvements relating to telephone transmitters and receivers. Improvements in and relating to electric signalling on railways. Percess for the manufacture of India-rubber Devices for spinning and twisting fibre Improvements in typewriting machines Improvements in the shing machines Improvements in threshing machines An improvement relating to motor ploughs Automatic charsa Improvements in threshing machine cylinders An improved igniting device for heating or illuminating apparatus, working with vaporized hydrocarbon. Improvements in storm and dustproof tiles and ridging. Folding box Upholsteries Improvements in and connected with bobbins for spinning. Improvements in and connected with devices for positioning shuttles in looms. Provements in column and floor of beam connections. Improvements in molds Improvements in bibling press of toggle lever type. Improvements in and relating to a gripping Liewellyn Wynn Williams and Liewellyn Wynn Williams.	. 74	Improvements in or relating to metallic rail-	Robert Dale McCarter.
Improvements in connection with furnaces for the direct production of iron and steel from iron ores. Process for the precipitation of precious metals from cyanide solution. Improvements in tires for wheels Improvements in fountains for decorative purposes. Improvements in or relating to the jointing of ropes of rubber to be used for wheel tyres and the transmission. OFFICE OF THE REGISTRAR OF CO-OPERATIVE SOCIETIES IN MYSORE.

Circular No.......C. S. 131 and 23, dated 16th November 1912.

Government Notification No. Fl. 1300--B. 51-09-2, dated 9th September 1910, is as follows:—

"In supersession of Government Notification No. Fl. 4725—B. 35-05-19, dated the 27th January 1906, and in exercise of the powers conferred by Section 25, Sub-section (1), clause (c) and Sub-section (2) of the Co-operative Societies Regulation, III of 1905, the Government of His Highness the Maharaja are pleased to remit all fees payable under the law of registration for the time being in force, in respect of instruments executed by or on behalf of any Co-operative Society for the time being registered under that Regulation or by an officer or member of such a society and relating to the business thereof.

Provided that the Government may at any time withdraw such exemption in the case of any society."

- 2. With reference to an enquiry as to the scope of the above notification and whether the exemption contemplated therein covers only the *ad valorem* fee payable for registration or the other miscellaneous fees leviable under the Registration Regulation, the Government of His Highness the Maharaja ruled as follows in their letter No. Fl. 2210—B. 4-12-2, dated the 21st September 1912, addressed to the Inspector-General of Registration in Mysore:—
- "Penalties under Sections 24 and 34 of Registration Regulation are not fees but fines, and process fees are not to be credited to Government but are payable to a process server; hence these penalties and process fees are not within the exemption. But the exemption would apply to such fees as are leviable under Section 78 for registration, private attendance, etc., and fees for attesting powers of attorney and for the safe custody of documents as they are fees to be credited to Government."
